Dr. Torry

My dear Sir

I received a letter some time since from you — All my plants have not arrived. As soon as they do you will be remembered — Dr. Parry will, he says, send to you, as soon as he comes across any he has not sent to you

Could you send as soon as convenient a list of the plants collected by me in the Indian Territory As it is wanted in order to name, the set of the same in the department of Agriculture which now is only with numbers. If any notes where with the plants forward the same

Please inform me if you gave tubers of the wild potatoe to the Editor of the American Agriculturalist 68 in Oct. number it is figured saying a friend gave him the wots but does not credit the department

Yours

E. Palmer. M.D.

I add a line to Palmer's letter. I think you
hardly have a list of Palmer Cherokee
plants. If you have. It would be too
much to ask you for a copy, unless
you had a Secretary: & Curator: I can
make out most of them. and if I
get stuck can ask you for the names
according to No. If you have however
a list and can lend it to me I will
see that it is returned. I have been
busy over Berlandier's plants. most of them
written but some nice things. I have
some Manuscripts of his from Tex.
Southwestern U.S. Nor any thing ever been published
of his collections. a personal history of
seems he was 1st sent out by De Candolle
and I have a long statement of "Jacquet"
plants: sent him up to 1831. Did De
ever publish anything about them? I
beg you will keep your eyes open for me
& you the lucky dog

Yours

S C Parry
